EDUCATION

Computer Science
Technical University of Cluj-Napoca
2009 - 2013

VOLUNTEERIN

Alumni
Board of Europeans Students of Technology
2012 - jetzt

SKILLS

- C#, XAML, HTML, CSS, TypeScript,
- Microsoft .NET, ASP.NET, WPF, Blazor
- SQL and NoSQL Datenbanken
- Google Cloud, Azure
- SCRUM, Agile
- Backend, UI/UX
- Fluent in English and German

Dan-Cristian Costea

Software Engineer

EXPERIENCE

- | | |
|--|----------------|
| Software Engineer II | 2026 - present |
| Siemens Digital Industries Graz | |
| Safety Engineering. SIMANTIC AX. New Product implementation. Working on safety compiler in .NET and macros in ST (Structured Text) | |
| Software Engineer II | 2022 - 2025 |
| Selmo Technology Söding | |
| Design and implementation of Selmo Studio, a model-based low-code platform for efficient and error-free automation of machines and industrial processes. Responsible for the development of graphical modeling functions, drag-and-drop editors, and automatic code generation for PLC systems. Focused on user-friendliness, compliance with industry standards, and support for users without programming knowledge. | |
| Software Engineer | 2018 - 2022 |
| GAMED mbH Graz | |
| Design and implementation of a software solution for the automated analysis of Overall Equipment Effectiveness (OEE) in industrial production environments. Use of modern technologies based on .NET and WinForms for intuitive capture, visualization, and evaluation of machine data as well as efficiency improvement through digital process optimization. | |
| Junior Software Engineer | 2016 - 2018 |
| SSI Schäfer Friesach | |
| "Contribution to the development and optimization of warehouse management processes with the internal tool WAMAS (Warehouse Management System) as well as integration of logistics-related interfaces. Implementation of individual customer requirements and support for automation in large distribution centers using Java. | |
| Junior Software Engineer | 2014 - 2015 |
| ABIS Software Graz | |
| Automation and digital processing of documents for a construction company using Microsoft .NET and Office 365. Design and implementation of efficient workflows to optimize document management and business processes, including integration of cross-team solutions and ensuring digital collaboration. | |
| Junior Software Engineer | 2012 - 2013 |
| NTT Data Romania Cluj-Napoca | |
| "Part-time internship during studies with a focus on the development and optimization of internal workflows as well as the creation of WebForms using Microsoft .NET and SharePoint. Activities included the analysis, design, and implementation of practical solutions in close collaboration with the team | |
